

2020 MU-2 AIRCRAFT PROP PILOT'S REVIEW OF PROFICIENCY

WHAT IS PROP?

Pilot's Review of Proficiency (PROP) is a highly acclaimed aviation safety seminar for pilots that is held in a convenient location in the United States. PROP has been offered biennially for over 20 years and is hosted by Mitsubishi Heavy Industries America, Inc. (MHIA). The specific date and location for each event is announced well in advance to allow for ease of planning. The speakers are experts in aviation safety who explore topics that enrich decision making and situational awareness for pilots, aircraft owners, instructors, service center mechanics, and anyone involved with MU-2 aircraft in particular.

WHY IS PROP IMPORTANT?

Learning and promoting a strong SAFETY CULTURE is the primary reason to attend the PROP seminar. The PROP event has proven to be instrumental in promoting the MU-2 Product Support Program and improving flight-safety. The organizers of PROP focus on increasing the knowledge and proficiency of the MU-2 owners and operators, as well as the importance of pilot training and the enhancement of safe operations including advanced training techniques, quality maintenance, and proper operating techniques. Some of the topics previously discussed at PROP are: Accident Analysis, Engine Familiarization, Flight Performance, Maintenance, Cold Weather Operations, MU-2 Safety Study Report, New and Upcoming Service Information, Pilot Decision Making, Operational Tips & Techniques, Airborne NEXRAD Radar, and Engine Ops. As a result of PROP, the MU-2 Product Support Program has achieved a # 1 status over the last 16 years and the MU-2 has experienced a dramatic improvement of its safety record.

WHO SHOULD ATTEND PROP?

Pilots flying an MU-2 are highly encouraged to attend but the seminar is open to anyone involved in operations and/or support of the MU-2, including prospective owner/operators and anyone interested in aviation safety. While this is not a substitute for formal training, you will learn a great deal about the safest and most efficient procedures for flying an MU-2 from highly experienced MU-2 operators, mechanics and system manufacturers.

For those who have attended PROP in the past, we look forward to seeing you again and for newcomers, we look forward to welcoming you to our MU-2 SAFETY CULTURE!
